**SUBJECT: Sumitomo Metal Mining Pogo LLC (Pogo) Source Test Plan for
Emission Unit 412 under Pogo's Air Quality Control Minor
Permit No. AQ0405MSS06.**

Dear Heather Valdez:

Sumitomo Metal Mining Pogo LLC (Pogo) plans to conduct a comprehensive source testing program to measure emissions of regulated pollutants from its new solid waste incinerator. Please find enclosed a source test plan. The source testing effort is scheduled to begin June 27, 2013.

The incinerator is currently permitted as emission unit number 412 under Pogo's Air Quality Control Minor Permit No. AQ0406MSS06. It recently became subject to emission standards in 40 CFR 60, Subpart CCCC, published by EPA in February 2013 as part of the final Commercial and Industrial Solid Waste Incinerator (CISWI) Rules. The source test program will be conducted according to the methods and procedures specified in Table 8 of Subpart CCCC and the attached test plan to demonstrate compliance with the applicable emission standards and/or to identify any pollution controls that may be needed to achieve compliance. A copy of the Test Plan was also sent to the Alaska Department of Conservation.

If you have any questions, please give me a call at (907) 895-2879 or email me at sally.mcleod@smmpogo.com.

Sincerely,

Sally S. McLeod, CEM, REM
Environmental Superintendent
